DETAILED ACTION

Response to Amendment

1. Amendment filed April 17, 2003 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 7, 29, 30, 34-36, 47-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Simons et al. (4,105,076).

Simons et al. discloses a concealed sprinkler head comprising: a housing 46; a thermally sensitive trigger assembly 50; a cover plate 42; a spring 51; passageway section (between elements 44).

Claim Rejections - 35 USC § 103

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Simons et al. (4,105,076).

Simons et al. discloses the limitations of the claimed invention with the exception of the spring having a first substantially linear section and a second substantially linear section joined by an arcuate section. C-shaped or bent over leaf springs are well known in that art. It would have been obvious to a person having ordinary skill in the art at the

Art Unit: 3752

time of the invention to have replaced the coil spring of Simons et al. with a C-shaped or bent over leaf spring to reduce space and weight.

Response to Arguments

5. Applicant's arguments filed April 17, 2003 have been fully considered but they are not persuasive.

In response to applicant's argument that Simons et al. does not disclose a "concealed sprinkler head that includes a cover plate that is removably mounted to the bottom of the housing of the sprinkler body, with the cover plate having a planar portion and a periphery, which extends around a planar portion, wherein at least a section of the periphery projects outwardly from the planar portion away from the sprinkler body to thereby form at least one passageway section to enable air to travel between the passageway section and the bottom of the housing of the sprinkler body," Simons et al. discloses a concealed sprinkler head that includes a cover plate 42 that is removably mounted to the bottom of the housing 46 of the sprinkler body 2, with the cover plate 42 having a planar portion (central portion) and a periphery (perimeter around the central portion of cover plate 42), which extends around a planar portion, wherein at least a section of the periphery projects outwardly from the planar portion (central portion) away from the sprinkler body 2 to thereby form at least one passageway section (between elements 44) to enable air to travel between the passageway section and the bottom of the housing 46 of the sprinkler body 2.

Art Unit: 3752

In response to applicant's argument that Simons et al. does not disclose the passageway section to project radially outward from the bottom of the housing, the passageway section, the "at least one passageway section" has been considered to include the flat outer perimeter of cover plate 42 beyond the radius of trigger 50.

In response to applicant's argument that Simons et al. does not disclose "a concealed sprinkler head that includes a cover plate that is formed with at least one undulation defining a ridge along the periphery of the cover plate, with the ridge defining at least one passageway section," Simons et al. discloses a concealed sprinkler head that includes a cover plate 42 that is formed with at least one undulation (the up and down edge of and around element 44) defining a ridge along the periphery of the cover plate, with the ridge defining at least one passageway section (between elements 44).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3752

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
